### Fetal Pig Dissection Day 1 Quiz

1. Where did this fetal pig come from? (was it born just for dissection?)
2. Draw a pig and label **posterior (caudal)**, **anterior (cephalad)**, **superior (dorsal)**, **inferior (ventral)**, and **side (lateral)** directions.
3. How can we tell how old the fetal pig is?
4. On your fetal pig, point to the pinna, nares, and umbilical cord.
5. On a male pig, where is the urogenital opening? (opening for liquid waste)
6. What are the tiny bumps on the ventral surface of the pig called? (In female pigs, these bumps connect to mammary glands.)
7. What is the muscle called that is the major muscle for chewing?
8. How many salivary glands are there?
9. On your fetal pig, point to the hard palate, soft palate, epiglottis, and tongue.
10. How can you tell pigs are omnivores?
